STATUS OF SPENT CARBON FROM THE SOUTH WALNUT CREEK IM/IRA - JMK-0664-92

Refs J M Kersh Itr, JMK-0569-92, to T. A Vaeth, Status of Spent Carbon from the South Walnut Creek IM/IRA, June 12, 1992

As a follow-up to our previous letter referenced above, EG&G Rocky Flats, Inc (EG&G) is providing this status update on the Granular Activated Carbon (GAC) units for the South Walnut Creek Interim Measure/Interim Remedial Action (IM/IRA). The status update addresses the time frame for handling the spent units.

EG&G had previously estimated the spent carbon would be transferred to drums and moved to Tent 1 the week of June 15, 1992 or June 22, 1992. In preparing for the transfer, additional issues involving material compatibility with waste stored in Tent 1 have arisen. We anticipate these issues will be resolved and the transfer date rescheduled shortly.

If you have questions on this issue, please contact D W Pontius at extension 8616 or E A Dillé at extension 8684, both of the Remediation Programs Division

J. M. Kersh, Associate General Manager
Environmental and Waste Management
